## GradeSpeed Gradebook

Schoolnet users who also subscribe to the GradeSpeed Gradebook can access real-time grade book information and navigation options. This widget only appears for sites that have a configured GradeSpeed URL.

The Gradebook widget may be configured to provide links to the Grades, Report Cards, Attendance, and Triggers widgets, as well as information on Upcoming Assignments, Recent Assignments, and My New/Dropped Students.

Two tabs are also included for reports sharing: Classroom Skills Analysis and Item Analysis. These two tabs offer teachers the option of sending tests to Gradebook. Tests sent in this way are pushed to GradeSpeed as assignments for that class's gradebook.

When sharing is first initiated, all existing scores for a test, for all sections where the test was administered, will pass to the Gradebook widget for all students who exist on the Gradebook widget. If test results are updated, or if new test results are added, after the initial sharing, then these scores will pass to the respective Gradebooks. If any errors occur in synchronizing this data, a detailed error message will appear.

**Note:** GradeSpeed integration may not be immediately available for all system users.

### Sharing Tests with Gradebook

Teachers can create a test in Schoolnet and then share it with Gradebook. In order for a test to share between Schoolnet and PowerTeacher Gradebook, the test category needs to be active.

To share a Classroom Test with Gradebook:

1. Click the Assessment Admin heading and find a test in the Ready to Schedule stage.
2. Click the test's title to get to the Test Detail page, then click Schedule.
3. Select a test start date, a test end date, and a score due date. The Schoolnet end date is added as the Date Due in PT Gradebook when you share the test.
4. Click the **Share scores with my PowerTeacher Gradebook** check box. If you want to grade part of the test (for example, open response test items) before sending the test results to Gradebook, then do not click the check box at this point. Instead, see the directions on how to share an already scheduled test.
5. Check the appropriate online test options, and assign the test.
6. Click Save. A message will confirm that you have shared the assessment with Gradebook. Once you set the test in Schoolnet to share with PT Gradebook, then Schoolnet becomes the source of record for that test. This means that, if you make changes to that test within PT Gradebook, your changes may be overwritten if a subsequent update is received from Schoolnet. To keep data from being overwritten, you must turn off Gradebook sharing for that test within Schoolnet.

**Note:** One of the categories in the PT Gradebook must be **Test**.

To share an already scheduled test with Gradebook:

1. Click the Assessment Admin heading and find the test that you want to share.
2. Click the test's title, then, under Gradebook, click Share Now.
